Disclaimer

You must read the following before continuing. The following applies to this document and the information provided in this presentation by CELLINK AB (publ) (the “Company”) or any person on behalf of the Company and any other material distributed or statements made in connection with such presentation (the “Information”), and you are therefore advised to carefully read the statements below before reading, accessing or making any other use of the Information. In accessing the Information, you agree to be bound by the following terms and conditions.

The Information does not constitute or form part of, and should not be construed as, an offer of invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company or a successor entity or any existing or future subsidiary or affiliate of the Company, nor should it or any part of it form the basis of, or be relied on in connection with, any contract to purchase or subscribe for any securities of the Company or any of such subsidiaries or affiliates nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever. Specifically, this presentation does not constitute a “prospectus” within the meaning of the U.S. Securities Act of 1933, as amended.

The Information may not be reproduced, redistributed, published or passed on to any other person, directly or indirectly, in whole or in part, for any purpose. The Information is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident of, or located in, any locality, state, country or other jurisdiction where such distribution or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction. The Information is not for publication, release or distribution in the United States, the United Kingdom, Australia, Canada or Japan, or any other jurisdiction in which the distribution or release would be unlawful.

All of the Information herein has been prepared by the Company solely for use in this presentation. The Information contained in this presentation has not been independently verified. No representation, warranty or undertaking, expressed or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the Information or the opinions contained herein. The Information contained in this presentation should be considered in the context of the circumstances prevailing at that time and has not been, and will not be, updated to reflect material developments which may occur after the date of the presentation. The Company may alter, modify or otherwise change in any manner the content of this presentation, without obligation to notify any person of such revision or changes.

This presentation may contain certain forward-looking statements and forecasts which relate to events and depend on circumstances that will occur in the future and which, by their nature, will have an impact on the Company’s operations, financial position and earnings. The terms “anticipates”, “assumes”, “believes”, “can”, “could”, “estimates”, “expects”, “forecasts”, “intends”, “may”, “might”, “plans”, “should”, “projects”, “will”, “would” or, in each case, their negative, or other variations or comparable terminology are used to identify forward-looking statements. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied in a forward-looking statement or affect the extent to which a particular projection is realised. Factors that could cause these differences include, but are not limited to, implementation of the Company’s strategy and its ability to further grow, risks associated with the development and of the Company’s products, ongoing research and development, the ability to commercialize the Company’s products, technology changes and new products in the Company’s potential market and industry, the ability to develop new products, the impact of competition, changes in general economy and industry conditions and legislative, regulatory and political factors. While the Company always intends to express its best judgment when making statements about what it believes will occur in the future, and although the Company bases these statements on assumptions that it believe to be reasonable when made, these forward-looking statements are not a guarantee of its performance, and you should not place undue reliance on such statements. Forward-looking statements are subject to many risks, uncertainties and other variable circumstances. Such risks and uncertainties may cause the statements to be inaccurate and readers are cautioned not to place undue reliance on such statements. Many of these risks are outside of the Company’s control and could cause its actual results to differ materially from those it thought would occur. The forward-looking statements included in this presentation are made only as of the date hereof. The Company does not undertake, and specifically decline, any obligation to update any such statements or to publicly announce the results of any revisions to any of such statements to reflect future events or developments.

The future of medicine is here

A unique life-science solution provider

- Net sales amounted to SEK 51,518 thousand (SEK 31,997 thousand), 61% (94%) growth, of which 57% (23%) was organic growth.
- Operating profit before depreciation (EBITDA) amounted to SEK -14,383 thousand (SEK -2,434 thousand), affected by acquisition costs totaling SEK -9,511 thousand and revaluation of receivables and liabilities in foreign currency by SEK -6,482 thousand.
- Net income amounted to SEK -14,257 thousand (SEK -1,744 thousand), which generated earnings per share of SEK -0.33 (SEK -0.05)
- Rolling 12 months' net sales from consumables amounted to SEK 19,456 thousand (SEK 11,958 thousand), an increase of 63%.
- During the quarter, the company entered into an acquisition agreement for the German precision dispensing company Scienion AG for EUR 80 million.

Strong momentum since launch

Listed on Nasdaq
Stockholm (CLNK B)

Market cap: SEK ~10.5bn

~330 employees

The Modern Healthcare Challenges

High costs and lengthy processes for drugs to reach patients. **9 out of 10 fail in clinical stages!**

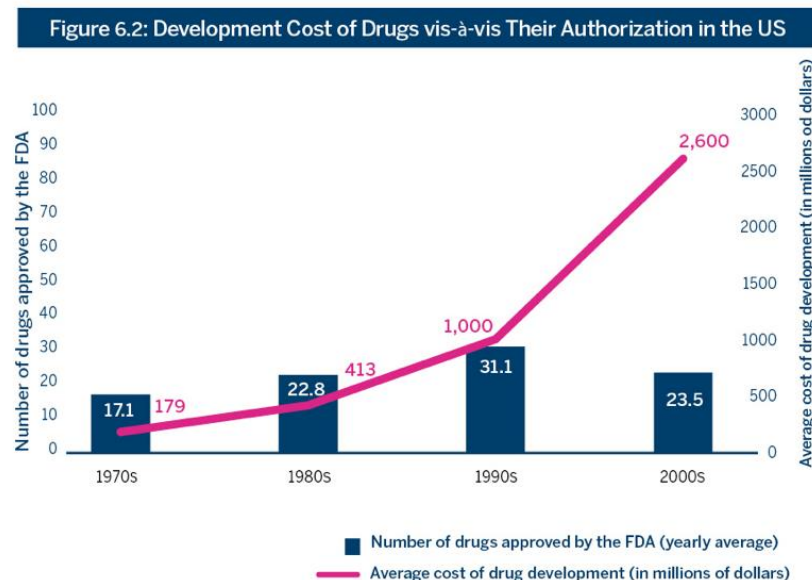

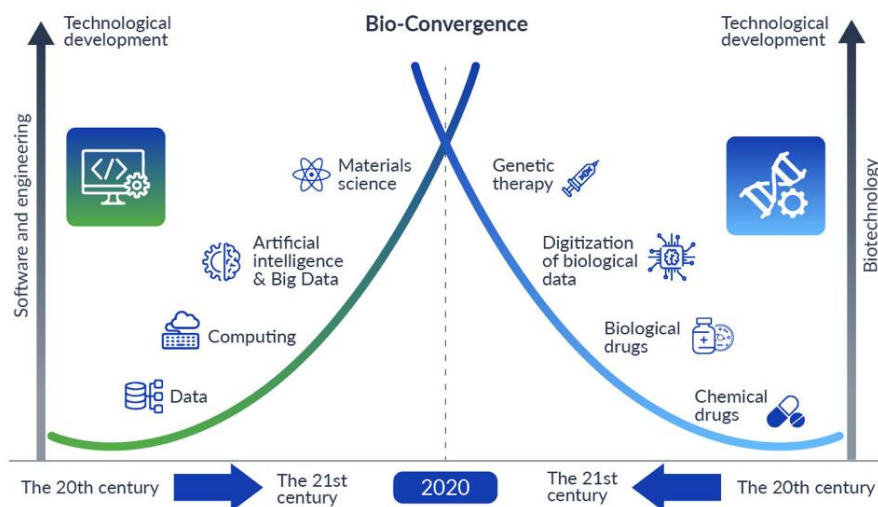

A life is lost **every hour** of the day due to lack of organ transplants

Animal studies are **poor indicators** of success for human drug development

The solution is a combination of many solutions

“These challenges obligate health systems and the bio-pharm industry to undergo drastic changes, to identify and develop precise, personalized and effective medical solutions. The attempt to contend with these challenges has given rise to a new multidisciplinary industry known as bio-convergence that is based on connecting various technologies from the fields of biology and engineering. This industry is expected to form the future base of medicine and to reshape the global health industry.4”

The solution is found in bio-convergence

Drug discovery

3D Cell culturing

Regenerative medicine
- tissue printing

CRISPR & gene editing

Diagnostics and
biological sensors

Single Cell Omics

Bioelectronics

Biopharmaceuticals

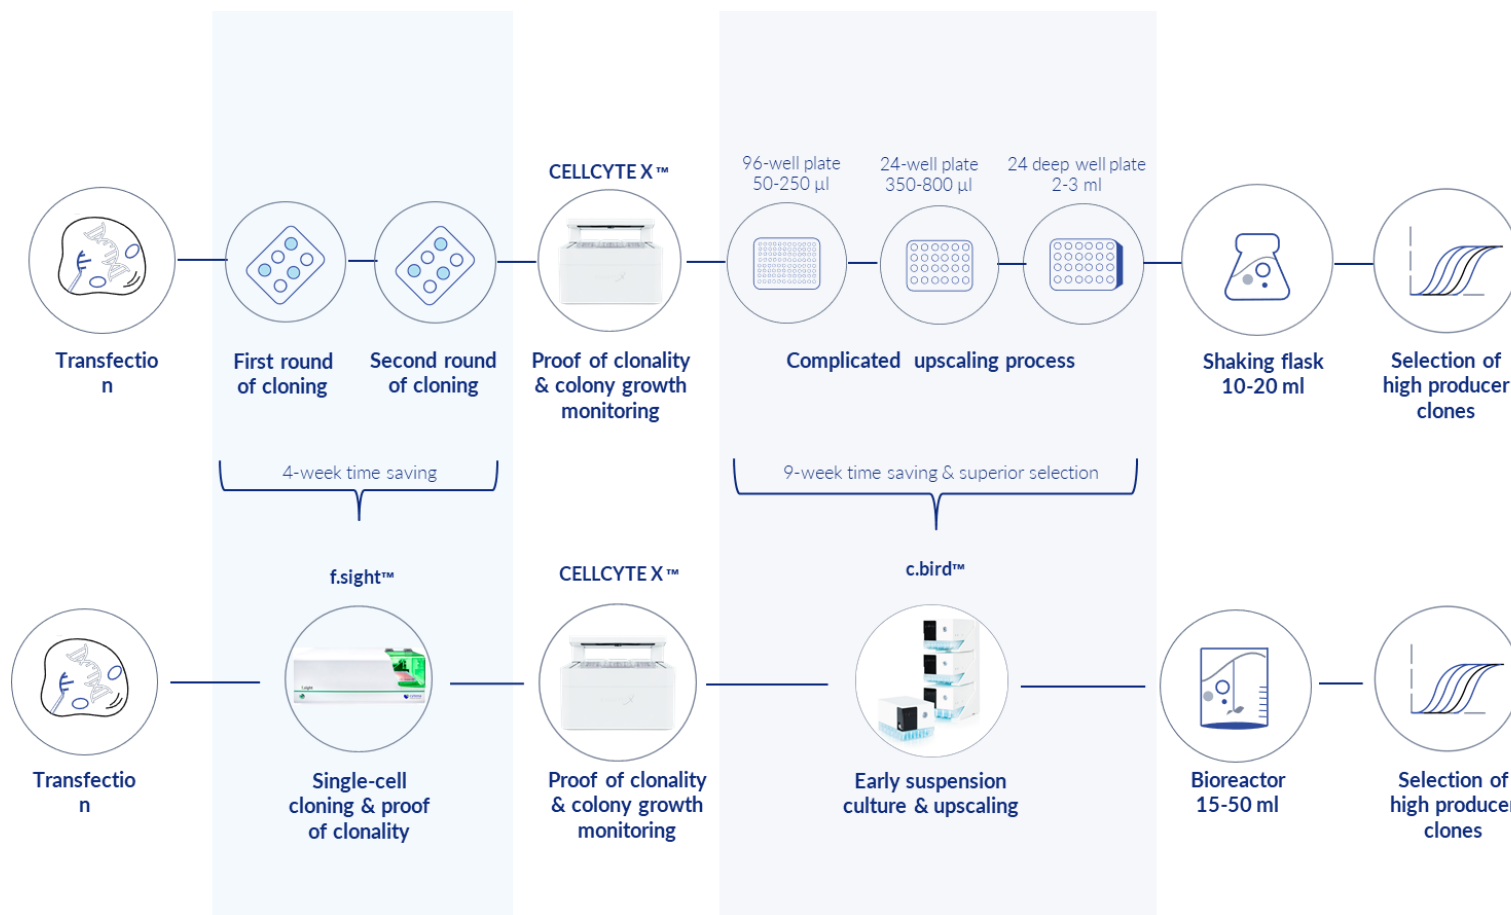

The Bio-Convergence Company

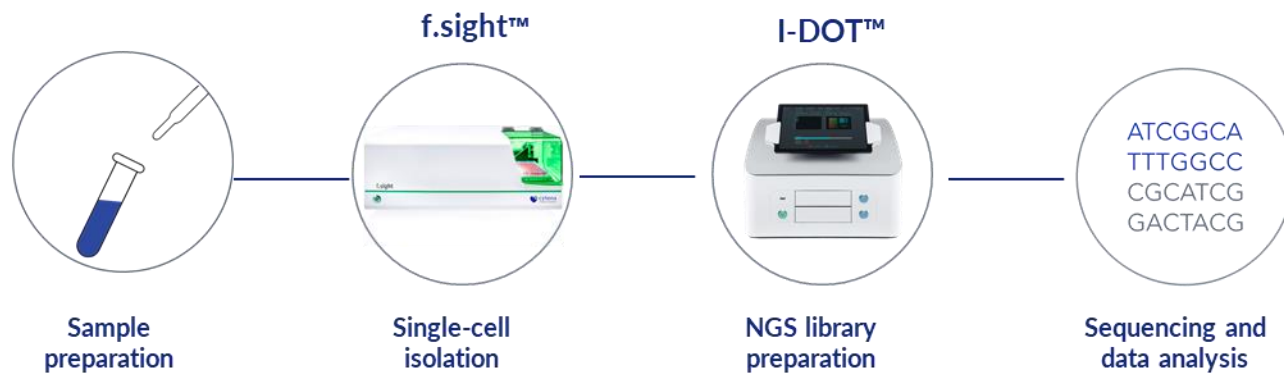

CELLINK is creating the future of medicine by providing technologies, products, and services to create, understand, and master biology

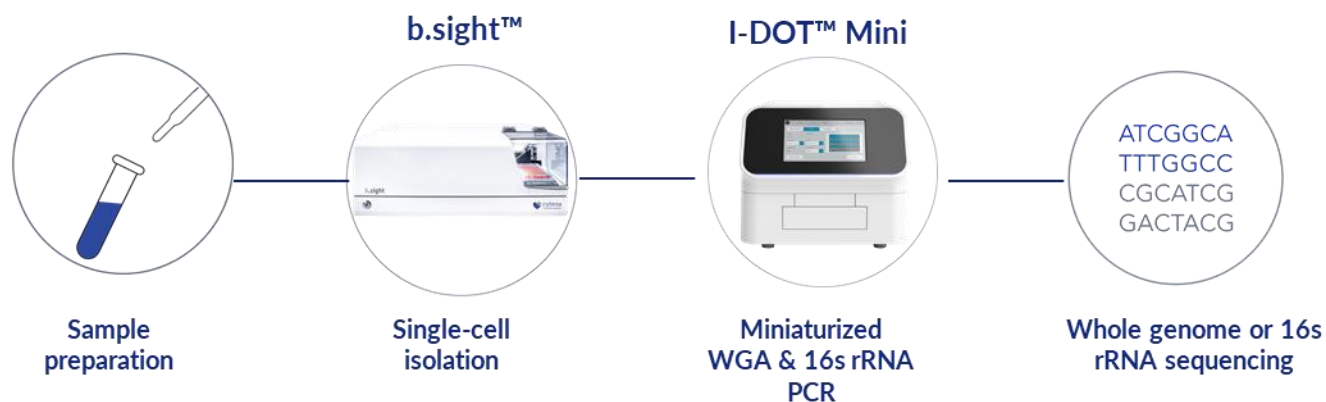

Optimized Cell Line Development workflow

Our platform for plate-based single-cell omics workflows

Single-cell genome sequencing

Fabrication and analysis of tissue models

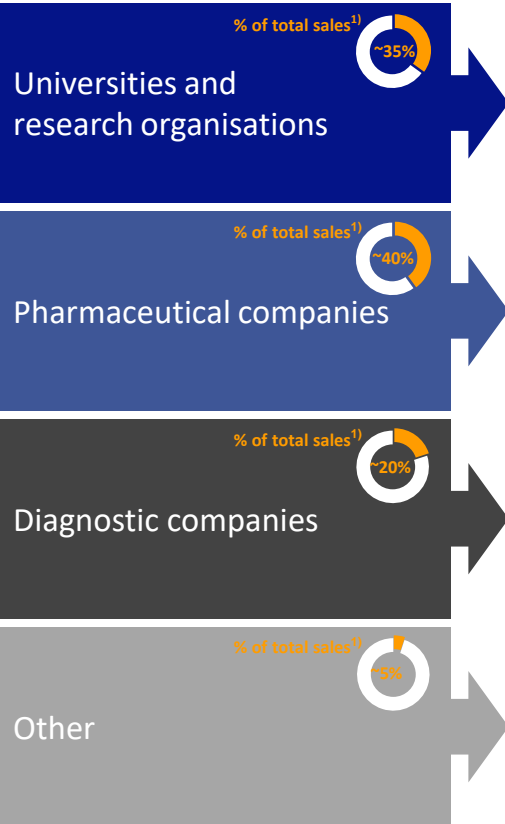

Market size

Note: 1) USD 1.9 billion in 2018 growing at a CAGR of 8.9% over the forecast period between 2018-2023, 2) USD 1.4 billion in 2016 growing at a CAGR of 17.3% over the forecast period between 2017-2025, 3) USD 2.65 billion in 2017 at a CAGR of 7.2% over the forecast period between 2017-2022. Source: BCC Research 2019 (Current Bioprinting Prospects and Future Innovations), MarketsandMarkets (2019 Cell Culture Market by Product, Live Cell Imaging Market by Product, Liquid Handling System Market by Type), Market Study Report 2019 (Global 3D Cell Culture Market Growth 2019-2024), Grand View Research (Single Cell Analysis by Application).

Diversified customer base

Customer group

Main application areas

- Human implants (e.g. bone), biomaterials research, cell biology, Single cell Omics, teaching etc.
 - Exploratory research that, if successful, will convert to clinical applications
 - ~600 institutions in 55 countries¹⁾
- Cancer research, biopharmaceuticals, drug development, gene therapy and tissue culture and engineering
 - Over 50 customers with about majority of top 20 pharma's as customers¹⁾
 - Early stage; segment revenue is expected to grow rapidly in the next 3 years
- Cancer research, biopharmaceuticals, drug development, gene therapy and tissue culture and engineering
 - Long relationships and contracts with many of the larger actors in the field
 - Established; segment revenue is expected to grow steadily
- Wide range of application areas (e.g. packing solutions, car materials, skin tissues and transplants)
 - Large potential in the next 5-10 years

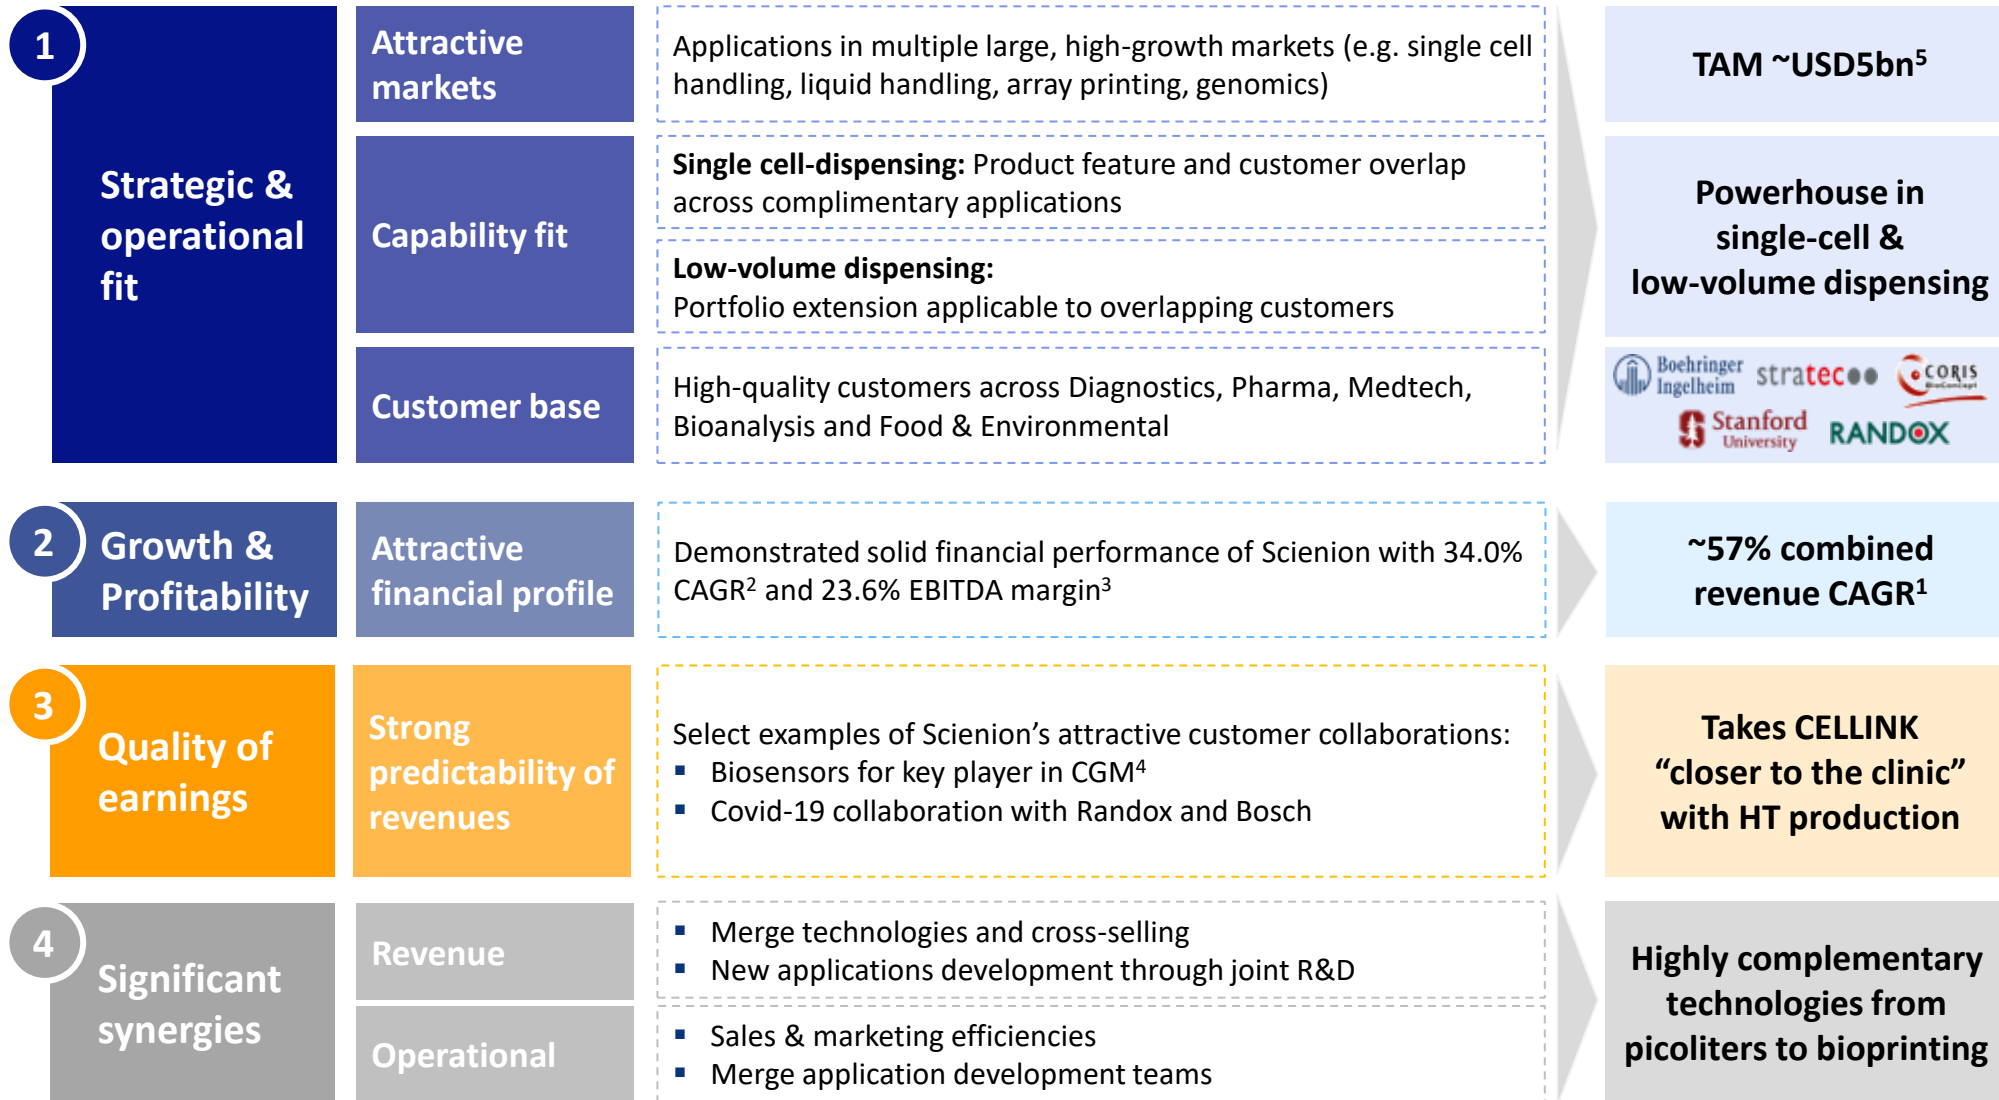

Selected customers

Note: 1) Estimates on new group.

CELLINK's transformational combination with Scienion creates a global leader in Single Cell handling and precision dispensing

Source: Information provided by Scienion and CELLINK management analysis

1) Combined CAGR based on CELLINK 2Q LTM financials for the respective year (e.g. March 2019 - February 2020 for 2019A)

2) 2017-2019A (Scienion)

3) 2019A (Scienion)

4) Continuous Glucose Monitoring

5) 2019 total addressable market for single cell analysis and liquid handling systems

Exciting combined financial profile from Acquisition

Combined historical revenue development (EURm)¹

Cellink net sales based on 2Q LTM for the respective year (e.g. LTM Feb-2020 for 2019A)

Comments

- Combined growth profile of 57% CAGR over the past three years
 - Scienion's strong revenue development of 34.0% CAGR 2017-2019A mainly driven by products of S series and Cellen One
- Combined platform offer the opportunity to continue the growth profile in the medium term
- Due to the Covid-19 pandemic, while pro-forma revenue growth is expected for the full year the growth rate is likely to be temporarily and negatively impacted compared to 2019
 - A large portion of the existing pro-forma customer base is directly or indirectly government backed (universities, research groups), mitigating the impact of the Covid-19 pandemic

Source: Information provided by Scienion and CELLINK management analysis

Note:

1) CELLINK financials based on 2Q LTM net sales (i.e. March 2019 - February 2020 for 2019A) and Scienion financials as of December Fiscal Year End; applied SEK to EUR exchange rate of 0.0970 as of 7th August 2020

Metrics – Q4

Source: Q4 report.

Clear strategy for further growth

Organic growth initiatives

1

Continued focus on R&D and innovation to improve customer value proposition by new products and service offering

2

Scale-up organisation to meet increased global demand and position CELLINK as the technology leader within Bioconvergence

3

Expand global sales team in U.S., Asia and Europe

Strategic M&A agenda

- Pursue selective acquisitions with complementing businesses to strengthen market position and enter new markets
- Acquisitions will be strategic, with proven business models and products with demonstrated revenues and profits, or a clear and short way to profit
 - ➔ Acquisitions can be financed through a combination of new shares and cash
- The screening process is conducted through conferences and customer visits within the three application areas

Investment rationale for recent acquisition

- ✓ Natural part of the research flow and strong presence in pharma (90% of customer base)
- ✓ Products that can be combined both with CELLINK and Dispendix in the work flow
- ✓ ~30 MEUR transaction, 60% in shares, projected revenues of EUR 4.5m 2019 and EBITDA margin of 40%

- ✓ Adding the scale up capabilities for costumers
- ✓ Strengthening our position in Single cell handling
- ✓ ~80 MEUR transaction, 50% in shares, revenues of EUR 22m 2019 and EBITDA margin of 25%%

- ✓ Part of the bioprinting and drug development screening process
- ✓ Cross-sales and increased customer value
- ✓ 5 MEUR transaction, 60% in shares, projected revenues of EUR 1.7m 2019

A 3D environment is crucial for the development of complex structures and the network formation of HUVECs.

Sprouting of HUVECs can only be seen in 3D culture and not in 2D.

2D culture Day 3

3D culture Day 14

Stem cells retain their pluripotency in 3D cultures

iPSCs stains for Pluripotency Markers OCT4, SOX2 and NANOG in 3D Cultures after 7 days.

2D culture Day 4

3D culture Day 14

Lung cancer marker in 3D cultures resembles the *in vivo* like expression

Specific Cell Marker β -Catenin Show More Relevant Staining in 3D Models with A549 Lung Adenocarcinoma Cells.

2D culture Day 4

3D culture Day 14

Rearrangement of liver cells to a more organotypic phenotype

HepG2 Rearrangement and Organotypic Phenotype in 3D culture.

2D culture Day 4

actin

3D culture Day 14

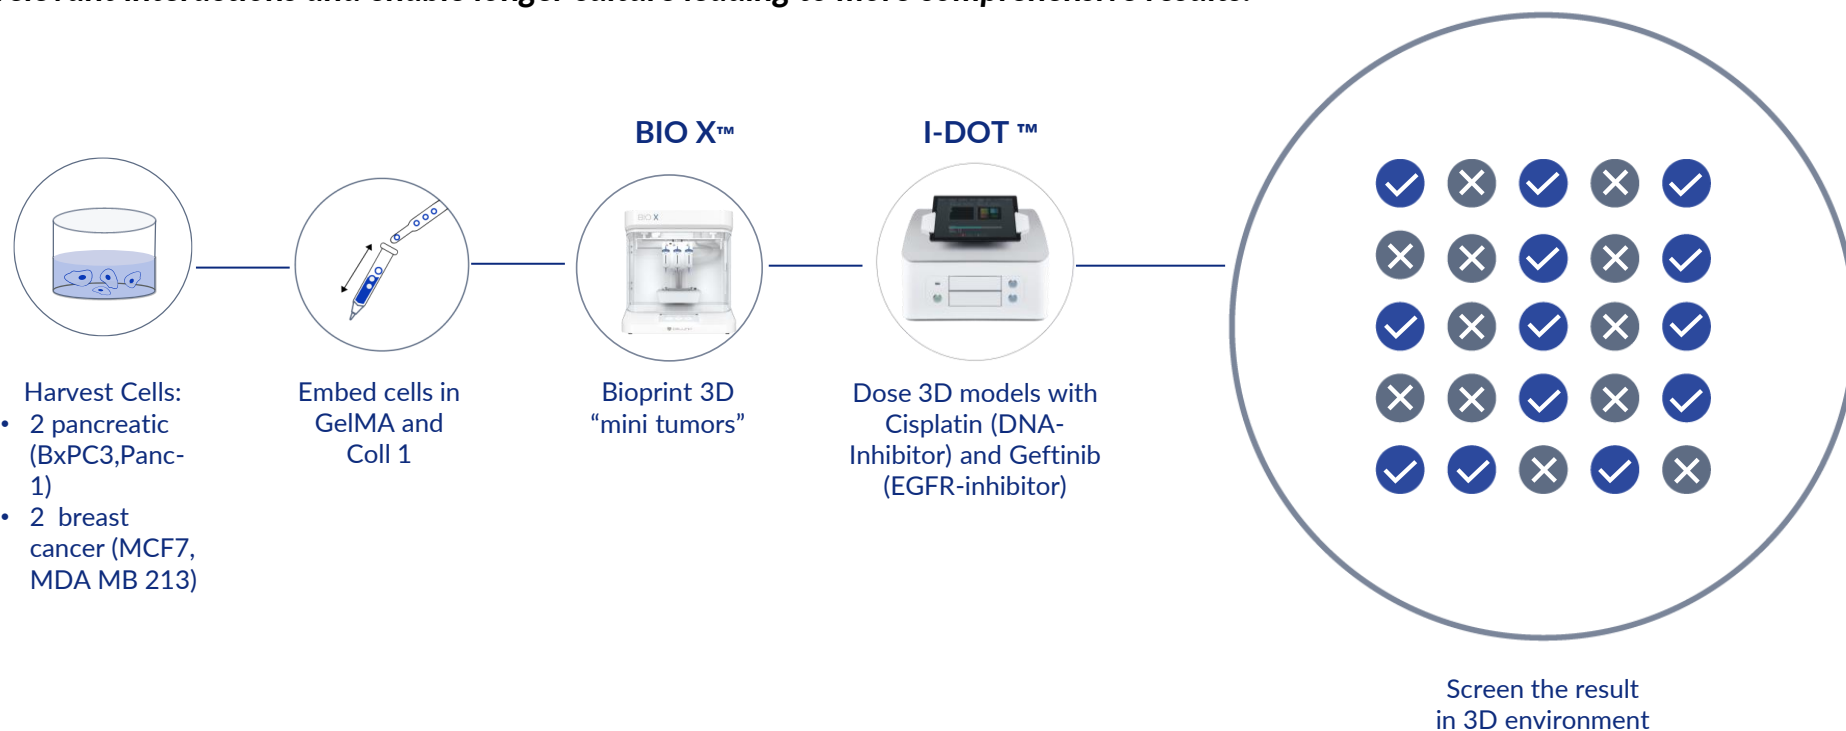

actin

Comparing Cancer Drug Efficacy in 2D vs 3D

3D tumor models better recapitulate the tumor microenvironment.

Bioprinting opens the door to improved drug testing workflows. 3D models provide more physiologically relevant interactions and enable longer culture leading to more comprehensive results.

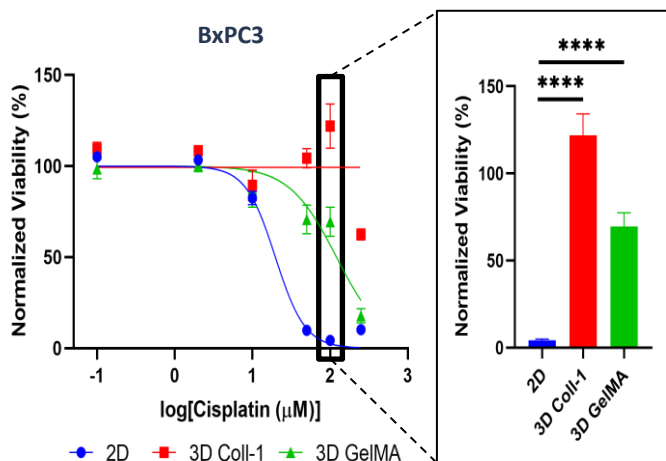

Avoid false results due to 2D screening

With improved 3D models like the mini tumors minimize the risk of false positives and negatives.

CISPLATIN

False Positive

GEFITINIB

False Negative
